TOM BEARD BARREL PICKER

NEW forklift attachment to lift and transport barrels safely.

- Designed to safely remove stacked barrels from the inside of trucks, and safely load on to barrel racks.
- Reduces the chance of employee injury lifting and moving heavy barrels.
- Manufactured out of 304 stainless steel for sanitation and durability.
- Mounts to forklift mast similarly to the forks and is locked onto the forklift.
- Utilizes forklift hydraulic system four (4) valves to control barrel gripping and forward tipping.
- Features quick-connect hydraulic fittings and a quick-connect mast system for easy installation and fast change overs.
- Can be customized to any class of forklift mount.
- Barrel Picker works on empty wine and Spirit barrels with a croze end (near the quarter hoop) barrel diameter range of approximately 22" to 26" at a 31 1/2" spacing from barrel center.

Patent Pending
