

OENOTANNIN PERFECT

**Pure grape seed tannins
for the running off and the end of alcoholic fermentation.**

CHARACTERISTICS

OENOTANNIN PERFECT is a grape seed extract with a fraction of high molecular weight tannins. Oenological tannins extracted from grape seeds, called condensed tannins or proanthocyanidins, are very qualitative tannins. Of the same structure as tannins naturally present in wine, they play a considerable role in its stabilization.

OENOFRANCE offers a range of 3 grape seed tannins extracted from fresh and rapidly processed white grape pomace and differing according to their extraction procedures.

OENOTANNIN PERFECT provides pure proanthocyanidins that are less polymerized than those of **OENOTANNIN VELVET** or **OENOTANNIN INITIAL**.

OENOLOGICAL PROPERTIES

- Removes harshness of wine because it reacts with wine polyphenols (tannin polymerization, tannin-anthocyanin complexing...).
- Stabilizes the coloring compounds of the wine.
- Protects wine from oxidation.
- Has a high antiradical activity.
- High active tannic fraction.

APPLICATION FIELD

- For the running off and the end of alcoholic fermentation.

APPLICATION RATES

Recommended application rate : 0.5 to 20 g/hL.

· With white and rosé wines : 0.5 to 10 g/hL.

· With red wines : 5 to 20 g/hL.

Maximum application rate according to current European regulations: none.

INSTRUCTIONS FOR USE

Dissolve **OENOTANNIN PERFECT** in 20 times its weight of must or wine.
Add to the volume to be treated. Ensure proper homogenization.

Precautions for use :

For oenological and specifically professional use.
Use according to current regulation.

INGREDIENTS

Proanthocyanidins tannins exclusively from grape seeds.

PACKAGING

500 g bag – Box of 20 x 500 g.

STORAGE

Store unopened package away from light in a dry and odourless area.

Opened package : use rapidly.

Use before the best before date (BIUB) stamped on package.
