AUTOMATIC POST SORTING TABLE

TWO SHOT BERRY REMOVAL SCREENS, AN ADJUSTABLE JACK REMOVAL SYSTEM AND A SORTING TABLE ALL IN ONE

TECHNICAL CHARACTERISTICS

THE NEW "AUTOMATIC SORTING TABLE" HAS BEEN DESIGNED FOR THE FOLLOWING APPLICATION:

- REMOVAL OF SHOT BERRIES AND SEEDS
- REMOVAL OF STEMS OR ANY OTHER LARGE DEBRIS
- REMOVAL OF "JACKS"

THIS NEW TABLE CONSISTS PRIMARILY OF A VIBRATING TABLE CONSTRUCTED IN TWO LEVELS AND WITH 3 SECTIONS, EACH ONE DEDICATED TO A SPECIFIC APPLICATION:

FIRST SECTION: SEPARATION OF SHOT BERRIES, WITH DRAWER STYLE COLLECTION SCREENS. EASY TO REMOVE AND TO CLEAN. THE DOUBLE DRAWER-SCREEN ALLOWS THE OPERATOR TO CLEAN SCREENS WITHOUT STOPPING THE UNIT.

SECOND SECTION: REMOVAL OF STEMS. THIS IS THE CORE OF THE TABLE AND HAS BEEN DESIGNED AND PATENTED BY CRIVELLER. IT CONSISTS OF A SLOTTED SCREEN ON WHICH PARTS OF THE SLOTS ARE ADJUSTABLE IN WIDTH AND IN INCLINATION THUS ALLOWING THE BERRIES TO GO THROUGH (AND FALL INTO THE LOWER SECTION) WHILE THE STEMS AND OTHER DEBRIS CONTINUES FORWARD AND ARE COLLECTED THROUGH SIDE DISCHARGE CHANNELS

THIRD SECTION: MANUAL INSPECTION AND ADDITIONAL DEBRIS REMOVAL. IT CONSISTS OF A FLAT SURFACE, WHERE THE OPERATOR CAN MANUALLY INTERVENE AND REMOVE ANY DEBRIS THAT MAY HAVE PASSED THROUGH AND A SECONDARY SCREEN FOR THE REMOVAL OF ANY "JACKS", SHOT BERRIES OR SEEDS THAT AVOIDED THE FIRST SECTION

THE ENTIRE STRUCTURE IS MADE IN STAINLESS STEEL. A FREQUENCY DRIVE IS PROVIDED TO CONTROL THE VIBRATION INTENSITY AND CONSEQUENTLY THE SPEED OF THE UNIT. TABLE IS ON WHEELS (TWO WITH BRAKES) BUT IS ALSO PROVIDED WITH ADJUSTABLE LEGS.
