

Wine Spoilage Micro 2-Hr Test – Quality & Big Savings

Winemaking is both creative and demanding. Great wine requires having the right team ready with the right tools. Among the challenges, you need to anticipate and react quickly to signs of wine spoilage.

Here is how Unitech Scientific's new [Wine Micro](#) 2-hour test can improve wine quality & save money!

- Its a **GREAT value!** Only \$432 for 24-tests; less than our competitors' kit
- **Detects 8 wine spoilage organisms/test**
 - Results directly from a wine sample by MultiPlex PCR (competitors detect only 1-microbe.)
- **Easy to perform, Visually read, 1-cell/sample detection.**
- The **complete Wine Micro SYSTEM** includes a **micro-thermocycler** - an 8-well heat portable unit programmable between 30°C and 105°C, plus tubes & accessories. Get started for under \$1000, or use your current set-up.
